

Environmental Sustainability Skills for Managers

OVERVIEW:

IEMA Environmental Sustainability Skills for Managers is one of a suite of courses, under the banner of Environmental Sustainability Skills for the Workplace, which is a new development programme aimed at non-environmental specialists. The aim of this two-day course is to support managers and supervisors in understanding the strategic and operational implications environmental sustainability has on them, their team and department, enabling them to contribute to the improved environmental sustainability of their organisation.

WHO IS IT FOR?

This course is aimed at supervisors and managers from any industry or business sector.

KEY FEATURES:

- No prior environmental knowledge required
- Practical activities and workshops throughout
- Can be tailored to suit individual company needs
- Helps ensure managers and supervisors understand their role in promoting sustainability within an organisation

LEARNING OUTCOMES

On successful completion of this course:

- The Learner will evaluate drivers for change and barriers.
- The Learner will apply knowledge and understanding to baseline data to monitor and improve performance.
- The Learner will apply knowledge of environmental sustainability across the value chain.
- The Learner will demonstrate the importance of implementing resource efficiency.
- The Learner will demonstrate how employees can improve environmental performance.

ASSESSMENT

- Online examination
